I am currently attending and about to graduate from New York City College of Technology's, Computer Information System program. I am familiar with the web application architecture and have worked with many programming languages as well. Previously I was developing backend using Java, but now I am working completely with JavaScript on both frontend and backend.  I am looking to start my career by obtaining a position as a web developer.

## SUMMARY

- Fluent in JavaScript [ES6+]
- Good understanding and experience of using React with Redux
- Comfortable working with backend using Express.js and ORM tools like Mongoose.js
- Fluent developing in MERN stack.
- Knowledgeable in HTML & CSS
- Comfortable with SCSS
- Experience using Webpack as a bundler and some understanding of Grunt/Gulp workflow.
- Comfortable with both SQL and NoSQL databases
- Experience with version control using GitHub
- Experience deploying applications using Heroku
- Extensively worked with Java and JSP for college projects.
- Also worked with Java Spring briefly.

## EDUCATION

*New York City College of Technology,*
Bachelor: Computer Information System (last semester)

## HIGHLIGHTS

- Can learn new technologies quickly.
- Ability to operate with minimal supervision.
- Authorized to work in the US.
